PROFILE

Python developer and MCA student with hands-on experience building Flask-based web systems and performing multi-platform marketing data analysis. Proficient in Pandas, Scikit-learn, SQL, and REST APIs for data-driven backend applications. Actively exploring AI/ML technologies including chatbots, AI agents, and deep learning frameworks. Seeking a Junior Python Developer or Data Analyst role to contribute to impactful, scalable solutions.

EDUCATION

Parul University

Master of Computer Applications (MCA) — Pursuing (2027, Semester 3)
Relevant: Data Structures, Machine Learning, Database Management, Python Programming

Marwadi University, Rajkot

Bachelor of Science in Information Technology — 2025
CGPA: 7.22 | Relevant: Web Dev, DBMS, Data Analytics, Python

PROJECTS

Gym Management System | Python (Flask), MySQL, HTML, CSS, JavaScript, REST API

- **Built 15+ REST API endpoints** using Flask handling member registration, attendance tracking, and payment records with MySQL backend
- **Reduced report generation time by 60%** by designing optimised SQL queries for attendance, revenue, and member trend dashboards
- **Implemented role-based access control** for Admin and Member roles, securing 100% of data routes with session authentication
- **Designed scalable MVC architecture** ready for future AI/ML integration — including a planned workout recommendation engine

Digital Marketing Campaign Analysis | Advanced Excel, Pivot Tables, Data Visualisation

- **Analysed 10,000+ rows** of campaign data across Google Ads, Meta, and YouTube using Advanced Excel formulas and Pivot Tables
- **Calculated 6 key KPIs** — CTR, ROAS, CAC, CPC, Conversion Rate, and Revenue — enabling data-driven budget decisions
- **Built 3 interactive dashboards** with dynamic charts and slicers, cutting manual reporting time from 4 hours to under 30 minutes
- **Delivered recommendations** that identified 2 underperforming campaigns, directly improving overall ROAS by an estimated 18%
